## **Topic: What's the Problem? Unraveling the Puzzle of Behavior, Training & Performance**

This seminar provides attendees with a practical and powerful way of looking at any behavior, training or performance problem, and figuring out what to do. This systematic approach to unraveling the puzzle will help any handler, novice or expert, identify the areas that need attention, recognize training methods that are effective, and understand their dog as a physical, emotional and mental being.

For the dog lover, this approach helps guide your thinking about behavior & training problems, and helps you identify where to turn to help -- and what kind of help you need and want.

For the dog training professional, this approach offers a number of powerful tools for quickly and accurately identifying the issues that may be at the root of any presented problem. This allows trainers to focus on areas that need to be built or that need strengthening or repair.

Above all, how do you know how and what needs work? How do you know if a method or equipment choice is right for you and your dog? There is a bewildering array of options and information out there. How do you know which way to go? Suzanne can help you find your way using your own good sense and specific approaches to finding answers.

Topics covered:

- The dog - physical, mental, emotional
- Clothier's Functional Assessment Tool (FAT)
- The handler - goals, skills, tools
- Control, Connection & Permission -- finding the strengths & gaps
- Training Triage - who, what, where, when, why
- What's right for you? Creating a framework for assessing tools, methods & results

**Attendees will be limited to 75. Until March 15, 2018, registrations will be accepted only from SCCTC members, two full scholarships for K-9 SAR handlers (first apply basis), and two half price caretaker scholarships for shelter and rescue personnel (first apply basis). After that time, registration is open to the public.**
